YOUR PACKAGING PARTNER

# Voutsinas Packaging

Global sourcing. A broad portfolio. Personal project coordination.

## Your requirements are our starting point.

Voutsinas Packaging connects businesses with packaging solutions through collaborations with leading manufacturing partners around the world. Our purpose is to find the right options for each customer and coordinate the process through one dedicated point of contact.

## A portfolio that goes beyond one material.

Our wider portfolio covers glass and plastic containers; pharmaceutical and cosmetic packaging; food and beverage bottles and jars; flexible packaging, including pouch bags and films; paper sacks; closures, accessories and secondary packaging.

## From your idea to a coordinated proposal.

We listen to your product needs, compare suitable formats and production capabilities, and coordinate samples, drawings, decoration, quotations and supply with our partners. This collection introduces beauty-packaging ideas within that wider portfolio.

### ONE RELATIONSHIP FOR YOUR PACKAGING PROJECT

You contact Voutsinas Packaging. We bring together the relevant packaging options and manufacturing capabilities, and manage the enquiry, sample review and commercial proposal with you.

RANGE AT A GLANCE

# A complete beauty packaging scope.

Explore material, structure, decoration and component choices.

### Glass bottles and jars

Glass bottles and jars with matched black closures for a coordinated skincare line.

### Plastic personal-care containers

Plastic bottles with varied shapes and dispensing heads for lotion and personal-care collections.

### Airless dispensing systems

A press-top jar dispenses cream through a treatment pump integrated into the upper assembly.

### Serums and dropper packs

Gradient color decoration gives coordinated serum packs a distinctive shelf presentation.

### Makeup compacts and palettes

Compact and palette packaging combines a case, internal pans and hinged opening.

### Perfume glass and decorative caps

Decorative glass and statement caps combine shape, tint and fragrance presentation.

## MORE POSSIBILITIES THROUGH ONE PARTNER

Tubes, refill structures, pumps, caps, bamboo components, PCR routes, metal tins, cartons, gift boxes, pouches and specialist containers. The following pages explain the formats and techniques shown.

COLLECTION & CAPABILITIES

# Glass bottles & skincare sets

Clear, colored, frosted and decorated glass options for a coordinated beauty range.

### Clear skincare collection

Glass bottles and jars with matched black closures for a coordinated skincare line.

### Colored glass collection

Color-coated glass with matching closures creates a consistent range identity.

### Amber serum bottles

Amber glass protects the visual identity of serum and oil formats; pipette and bulb are matched to the neck.

### Decorative perfume glass

Decorative glass and statement caps combine shape, tint and fragrance presentation.

### Sculpted treatment bottles

Rounded glass silhouettes can be paired with decorative caps and different dispensing systems.

### Frosted dropper collection

Frosted glass creates a satin effect; decoration and dropper components can be coordinated.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Develop your range through bottle silhouette, nominal fill volume, neck finish, cap style, color and decoration. Glass forming and custom tooling can be assessed for bespoke shapes.

COLLECTION & CAPABILITIES

# Cream jars & treatment pots

From conventional screw-lid jars to dispensing and replaceable-inner formats.

### Frosted cream jars

Cream jars with screw closures and an inner protective disc for treatment and skincare products.

### Square airless jar

A press-top jar dispenses cream through a treatment pump integrated into the upper assembly.

### Dispensing treatment pot

An airless treatment jar illustrates top-dispensing operation and coordinated outer styling.

### Replaceable inner jar

A removable inner cup is designed to be replaced while retaining the outer container.

### Colored jar collection

A coordinated treatment-jar range illustrates colored finishes and matched closures.

### Refill-oriented jar design

Jar, closure and inner cup are selected as a complete system for the intended product.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Explore glass and plastic jar families, inner cups, lids, sealing parts and decoration. Jar capacity, closure fit and formula compatibility are confirmed for the selected design.

COLLECTION & CAPABILITIES

# Plastic bottles & personal care

Lightweight packaging with distinct dispensing and closure choices.

### HDPE lotion-pump collection

Plastic bottles with varied shapes and dispensing heads for lotion and personal-care collections.

### Body-wash pump bottles

Pump bottles offer repeated dispensing for body wash and similar personal-care formats.

### Cylindrical personal-care bottles

Compact squeeze-bottle profiles provide a simple portable format with integrated closure styling.

### Pump and flip-top collection

A range of plastic bottles shows pump, spray and flip-top dispensing alternatives.

### Flip-top neck detail

Flip-top closures support squeeze dispensing and can be coordinated with bottle color.

### Foam bottle with brush head

A foaming dispenser with an application brush combines delivery and cleansing contact.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

PET, PP, HDPE, PETG and other polymer platforms can be explored across suitable designs. Select bottle rigidity, squeezability, color, neck finish and dispenser around the intended use.

COLLECTION & CAPABILITIES

# Serums, oils & droppers

Small-format treatment packaging with pipettes and dispensing details.

### Amber dropper bottles

Amber glass protects the visual identity of serum and oil formats; pipette and bulb are matched to the neck.

### Gradient serum collection

Gradient color decoration gives coordinated serum packs a distinctive shelf presentation.

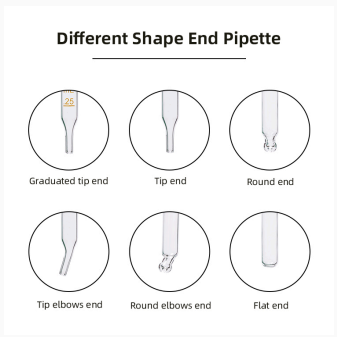

### Frosted glass droppers

Frosted glass creates a satin effect; decoration and dropper components can be coordinated.

### Refillable dropper concept

An exploded dropper concept shows the removable components of a refill-oriented design.

### Pipette-tip alternatives

Different pipette-tip geometries help evaluate delivery and application behavior.

### Dropper-cap configurations

Bulb, press-style and bamboo-component caps offer different handling and appearance.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Options include clear, amber and selected violet glass, plastic or glass pipettes, bulb and press mechanisms, and matched collars. Confirm the formula, desired dosing and closure interface.

**COLLECTION & CAPABILITIES**

# Airless bottles & jars

Bottle and jar systems with dispensing mechanisms selected as a complete pack.

### Airless cream jar

A press-top jar dispenses cream through a treatment pump integrated into the upper assembly.

### Airless treatment pot

An airless treatment jar illustrates top-dispensing operation and coordinated outer styling.

### Replaceable airless jar

A removable inner cup is designed to be replaced while retaining the outer container.

### Luxury dispensing collection

Metallic-look outer components can be combined with treatment pumps and matching overcaps.

### Dual-chamber serum format

Two chambers separate contents within one pack; the dispensing and formula combination is reviewed per project.

### Airless jar component view

An exploded jar view identifies the lid, pump, outer shell and internal moving components.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Assess pump dose, viscosity, priming, refill structure, inner vessel and decoration. Airless is a packaging architecture; final formula performance is evaluated through appropriate testing.

COLLECTION & CAPABILITIES

# Refill & dual-chamber ideas

Alternative structures for repeated use and multi-component formulas.

### Coordinated refill collection

Replaceable inner vessels allow the outer packaging design to remain in use.

### Refillable dropper concept

An exploded dropper concept shows the removable components of a refill-oriented design.

### Replaceable inner cups

A removable inner cup is designed to be replaced while retaining the outer container.

### Powder / liquid concept

A separation-and-release structure illustrates a powder/liquid packaging concept.

### Dual-chamber bottle

Two chambers separate contents within one pack; the dispensing and formula combination is reviewed per project.

### Refillable bamboo-component bottles

Glass and bamboo-component systems illustrate natural textures and refill-oriented assemblies.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Refill cartridges, replaceable cups and selected dual-chamber platforms can be developed around your brief. Refill handling, component separation and product compatibility require project review.

COLLECTION & CAPABILITIES

# Toners, sprays & foam pumps

Dispensing options for fluid formulas, cleansers and facial care.

### Fine-mist bottle collection

Portable spray and tube-shaped formats can form a coordinated travel collection.

### Foam dispenser with brush

A foaming dispenser with an application brush combines delivery and cleansing contact.

### Foam-pump bottle formats

Foam dispensers combine a container, foaming pump and protective overcap.

### Hand-soap dispenser

A foam-pump bottle illustrates printed artwork and countertop dispensing.

### Colored foam-pump collection

Colorful foaming packs combine pump mechanisms with coordinated decoration.

### Lotion-pump choices

Pumps and actuator shapes are matched to neck size, dose and the complete container.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Fine mist, foam, lotion and selected trigger dispensing options can be explored. Select spray pattern, output, cap protection and bottle finish together with the formula and filling method.

COLLECTION & CAPABILITIES

# Roll-on & portable treatments

Application-led formats for oils, fragrance, eye care and topical products.

### Colored roller-bottle set

Decorated roll-on bottles combine a cap, ball housing and container.

### Roll-on component details

A ball applicator illustrates rolling delivery and the matching closure assembly.

### Portable roller collection

Slim roll-on formats show alternative colors and printed outer finishes.

### Frosted roller bottles

Portable roll-on containers offer compact proportions and rounded caps.

### Roller-ball assembly

The ball and housing are shown separately to explain the dispensing assembly.

### Portable bottle components

A miniature spray bottle illustrates travel-size components and protective overcap.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Review ball material, housing, seal, neck interface and formula flow. Plastic and glass container options, travel packs and component finishes can be requested.

COLLECTION & CAPABILITIES

# Suncare & stick formats

Squeezable packs, tubes and solid-product dispensing formats.

### Squeezable sunscreen bottles

Squeezable bottles provide portable sunscreen and personal-care packaging formats.

### Sunscreen squeeze tubes

A flexible squeeze tube is paired with a flip-top cap and printed artwork.

### Compact roll-on style packs

Compact dispensing shapes show portable alternatives for treatment and suncare ranges.

### Offset-print tube idea

Full-color artwork can be adapted to the print area of a flexible cosmetic tube.

### Tropical artwork tube idea

A tube with a coordinated cap demonstrates bold print coverage and color matching.

### Labelled sunscreen bottle

A labeled bottle illustrates the combination of container color and artwork.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Explore portable bottles, tubes, sticks, flip-tops and selected applicators. Artwork shown illustrates decoration possibilities; SPF text is sample artwork, not a claim about an empty container.

COLLECTION & CAPABILITIES

# Cosmetic tubes & surface finishes

Flexible tube formats for hand care, cleansers, sunscreen and other suitable formulas.

### Soft-touch tube finish

Soft-touch treatment gives a flexible tube a tactile outer finish.

### Matte tube finish

A matte tube surface reduces gloss and creates a muted visual effect.

### Glossy white tube

A glossy surface offers a bright, reflective tube appearance.

### Metallic-look tube

A metallic-look finish creates a reflective effect on a cosmetic tube.

### Pearlescent tube finish

A pearlescent finish adds a subtle light-dependent sheen.

### Applicator tube formats

Narrow dispensing tips support controlled application of suitable product textures.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Specify tube volume, diameter, length, cap and applicator, barrier needs and print area. Decoration may include offset print, screen print, labels or foil effects where feasible.

**COLLECTION & CAPABILITIES**

# Foundation & complexion

Packaging concepts with pumps, bottles and components for liquid makeup.

### Square foundation bottles

Square bottles and pumps create a coordinated complexion-packaging collection.

### Frosted foundation format

Frosted foundation bottles illustrate pump dispensing with square decorative overcaps.

### Pump and cap components

Bottle, pump and cap components are selected around a compatible neck interface.

### Premium dispensing formats

Metallic-look outer components can be combined with treatment pumps and matching overcaps.

### Clear glass bottle family

Glass bottles and jars with matched black closures for a coordinated skincare line.

### Press-style closure alternatives

Bulb, press-style and bamboo-component caps offer different handling and appearance.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Glass, plastic and airless platforms can be evaluated around formula viscosity and required dispensing. Align bottle proportions, neck fit, pump output, overcap and decoration.

COLLECTION & CAPABILITIES

# Lip gloss & lip-care applicators

Tube silhouettes and applicator geometries for different product textures.

### Slim lip-gloss tube set

Slim gloss containers pair a wand and applicator with a matching cap.

### Tube and wand formats

Alternative tube, wand and brush configurations support different makeup applications.

### Lip-care sticks with sculpted cap designs

Sculpted cap styling differentiates the appearance of a lip-care stick.

### Flat doe-foot detail

A flat doe-foot applicator provides a broad contact surface.

### Reservoir-tip detail

An applicator with a reservoir opening illustrates a different product pickup geometry.

### Bamboo-component lip containers

Bamboo outer components add texture to lip-care packaging.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Review wand length, wiper fit, applicator shape, cap material and the fill formula. Selected squeeze-tip, doe-foot, brush and bamboo-component options are available for evaluation.

COLLECTION & CAPABILITIES

# Mascara & color cosmetics

Slim packs, wands and coordinated finishing choices.

### Mascara and liner collection

Slim color-cosmetic containers can accommodate different wand and brush systems.

### Compacts and color-cosmetic palettes

Compact and palette packaging combines a case, internal pans and hinged opening.

### Metallic-cap wand formats

A metallic cap finish can be paired with a slim black container.

### Pastel tube collection

Pastel-colored tubes illustrate matched barrel and cap colors.

### Black tube and applicator set

A mascara pack is assembled from container, wiper, wand, brush and cap.

### Decorated tube alternatives

Printed mascara barrels illustrate branding and artwork opportunities.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Develop cap shape, brush and wand assembly, wiper, color and decoration as a matched pack. Compacts, palettes and other makeup formats can also be assessed through your project brief.

COLLECTION & CAPABILITIES

# Perfume bottles & statement glass

Classic and sculptural glass forms for distinctive fragrance presentations.

### Decorative glass collection

Decorative glass and statement caps combine shape, tint and fragrance presentation.

### Relief-pattern perfume glass

Relief texture is formed into the glass surface to create a patterned fragrance bottle.

### Rectangular glass with wood-look cap

A rectangular fragrance bottle pairs glass geometry with a wood-look decorative cap.

### Dark decorative perfume bottle

A dark sculptural perfume bottle combines surface texture and a statement cap.

### Sculptural rounded bottle

A rounded fragrance silhouette illustrates decorative cap and glass-shape coordination.

### Classic fragrance silhouette

Tinted fragrance glass can be paired with a decorative cap and collar.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Explore bottle shape, relief, tint, base, neck finish, fine-mist atomizer, collar and decorative cap. Custom molds and coordinated presentation packaging can be reviewed.

COLLECTION & CAPABILITIES

# Fragrance samples & travel packs

Discovery kits, pocket formats and refillable atomizer ideas.

### Sample vials with custom artwork

Sample vials support discovery and promotional fragrance formats.

### Colored sample sprayers

Miniature sprays show compact atomizers with colored cap options.

### Portable spray-tube range

Small spray containers can be selected as part of a coordinated sampling range.

### Refillable travel atomizers

A refillable travel atomizer illustrates a portable fragrance-dispensing concept.

### Portable perfume formats

Slim travel atomizers provide a compact format with matching protective caps.

### Bottle and sprayer assembly

A miniature spray bottle illustrates travel-size components and protective overcap.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Sample vials, travel atomizers, plastic or glass containers and fitted gift sets can be sourced as a coordinated range. Confirm spray output, sealing and refill handling for the selected format.

COLLECTION & CAPABILITIES

# Bamboo, wood & component pairings

Material combinations for natural textures and coordinated closures.

### Bamboo-cap amber collection

Amber glass and bamboo components combine a warm visual tone and natural texture.

### Bamboo-component skincare collection

Bamboo-component caps and pumps can be coordinated across bottles and jars.

### Transparent refill concept

Glass and bamboo-component systems illustrate natural textures and refill-oriented assemblies.

### Bamboo lip-container family

Bamboo outer components are available for selected lip-care and cream formats.

### Bamboo-collar sprayer

A bamboo-component spray head illustrates the dispensing contact area.

### Bamboo-pump detail

A bamboo-component pump adds a natural texture to a personal-care bottle.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Bamboo and wood may be used as caps, collars, outer elements or decorative components. Specify the exact material, inner vessel, finish and intended separation of parts.

# PCR & alternative-material routes

A visual starting point for recycled-content and other material enquiries.

### Refill-oriented personal-care set

A personal-care collection illustrates refill-oriented and coordinated material choices.

### Pastel lotion-pump family

A matched bottle range shows opportunities for color, decoration and selected PCR routes.

### Refill skincare collection

Replaceable inner vessels allow the outer packaging design to remain in use.

### Bamboo and glass pairing

Bamboo-component caps and pumps can be coordinated across bottles and jars.

### Mineral-composite concept

A mineral-composite concept explores a textured surface and different material expression.

### Wood-fiber-composite concept

A wood-fiber-composite concept explores warm texture and alternative container styling.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

PCR plastics, PLA, refill systems, wood-fiber and mineral-composite concepts can be evaluated. Exact composition, supporting documentation and end-of-life suitability are confirmed per project.

COLLECTION & CAPABILITIES

# Aluminum & metal packaging

Tin formats and metallic components for suitable beauty and wellness applications.

### Decorative metal tins

An aluminum tin with relief decoration illustrates tactile lettering and screw-lid construction.

### Round tin container concept

Printed aluminum tins can be coordinated with secondary presentation boxes.

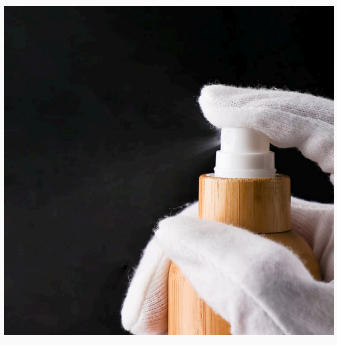

### Printed tin format

An aluminum tin illustrates full-color artwork and a matched outer carton.

### Beard-care tin concept

Printed metal lids offer a large area for brand artwork and product information.

### Metal / bamboo component pairing

A bamboo-component spray head illustrates the dispensing contact area.

### Metallized cap and bottle finish

Metallization creates a reflective finish on selected outer packaging surfaces.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Options include tin containers, aluminum components, jackets, collars and metallic finishes. Bare metal, coatings, liners and formula-contact requirements need to be specified.

COLLECTION & CAPABILITIES

# Caps, pumps & accessories

Finish the container with the right dispensing and closure system.

### Lotion-pump alternatives

Pumps and actuator shapes are matched to neck size, dose and the complete container.

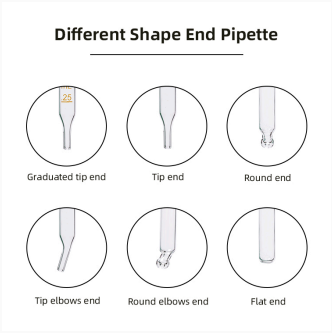

### Pipettes, caps and accessories

Caps, collars and pipette components are matched around the container neck.

### Dropper-cap alternatives

Bulb, press-style and bamboo-component caps offer different handling and appearance.

### Pipette-tip geometries

Different pipette-tip geometries help evaluate delivery and application behavior.

### Roller-ball assembly

The ball and housing are shown separately to explain the dispensing assembly.

### Foundation-pump components

Bottle, pump and cap components are selected around a compatible neck interface.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Explore screw, snap-on and crimp systems; pumps, sprayers, droppers, collars, overcaps and liners. Selected spatulas and applicators can be included in a complete proposal.

COLLECTION & CAPABILITIES

# Printed & decorated packaging

Different ways to carry artwork, texture and brand information.

### Offset-print decoration

Offset printing illustrates multicolor artwork applied to a compatible surface.

### Heat-transfer graphics

Heat-transfer decoration illustrates detailed graphics on the container.

### Paper-label application

Paper labels provide a separate printed decoration layer.

### Opaque matte finish

Plastic-film labels offer another route for graphics and product information.

### Spray-frosted finish

Frosting creates a satin, translucent glass appearance.

### Gradient coating

Spray coating changes color and opacity on selected packaging surfaces.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Decoration routes include screen and offset printing, hot stamping, UV metallic detail, laser marking, heat and water transfer, paper or film labels, embossing, debossing and selected tactile effects.

COLLECTION & CAPABILITIES

# Color, coating & metallic effects

Transform the visual character of a selected packaging platform.

### Matte coating

Plastic-film labels offer another route for graphics and product information.

### Translucent frosted coating

Frosting creates a satin, translucent glass appearance.

### Clear-to-white gradient

Spray coating changes color and opacity on selected packaging surfaces.

### Inner-color spray effect

Pantone-matched coating helps coordinate colors across a collection.

### Gold and metallic effects

Metallization creates a reflective finish on selected outer packaging surfaces.

### Pearlescent tube surface

A pearlescent finish adds a subtle light-dependent sheen.

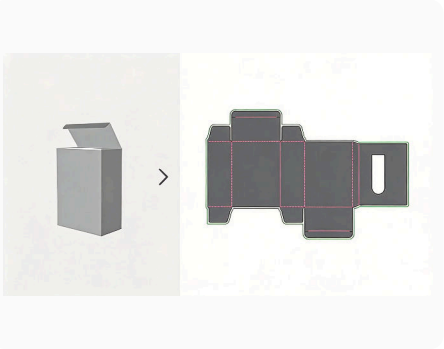

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Pantone matching, frosting, gradient spray, selected inside coating and metallization can be assessed. Confirm substrate, decoration durability and formula-contact requirements before approval.

COLLECTION & CAPABILITIES

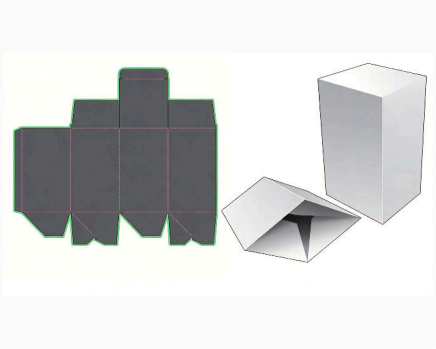

# Cartons, boxes & gift sets

Coordinate the primary pack with its secondary presentation.

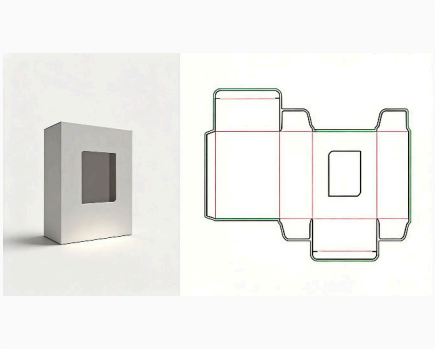

### Folding-carton structure

A folding-carton dieline explains panels, folds and the assembled outer box.

### Auto-lock carton layout

An auto-lock base layout shows the folding and closure structure of a carton.

### Window-carton design

A window carton reveals part of the product while providing an outer presentation.

### Hinged-lid presentation box

A hinged-lid presentation box can include an insert matched to the containers.

### Sliding drawer box

A drawer box combines an outer sleeve with a sliding inner tray.

### Slip-lid rigid boxes

A rigid slip-lid box offers a structured presentation for a gift set.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Folding cartons, rigid boxes, inserts, window packs, drawer, hinged-lid and slip-lid formats can be combined with your containers. Artwork, board, size and protective inserts are selected together.

**COLLECTION & CAPABILITIES**

# Pouches, sachets & specialist packs

Flexible and adjacent formats extend the available packaging scope.

### Sample / refill pouch concept

Spouted pouches illustrate refill and sample formats with a screw closure.

### Unprinted gusseted pouch

An unprinted gusseted pouch shows the base and side structure of a flexible pack.

### Black barrier-pouch formats

Barrier-pouch shapes can be assessed around protection, seal and closure requirements.

### Decorative concentrate jars

Decorated specialist jars illustrate metallic effects and compact closures.

### Compact dark jar

A compact dark jar illustrates a wide-mouth specialist container.

### Violet-glass jar format

Violet-toned glass offers an alternative visual finish for selected jar formats.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Explore selected pouches, sachets, barrier bags, child-resistant formats, concentrate jars and CBD-related packaging. Application, market and closure requirements determine the proposed format.

COLLECTION & CAPABILITIES

# Vials, ampoules & dispensing formats

Small containers and specialist options for cosmetic and wellness enquiries.

### Amber ampoule formats

Glass ampoules illustrate sealed small-volume containers for suitable applications.

### Small vial container set

Small vials show different closure and crimp-component options.

### Amber and clear vial formats

Clear and amber vials can be assessed around volume and application requirements.

### Glass-vial component details

A component view explains the glass vial, rubber stopper and aluminum cap.

### Precision dispensing formats

Precision dispensers illustrate alternative applicator and dosing geometries.

### Syringe-style component concept

A syringe-style dispensing concept illustrates a different delivery structure.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Vials, ampoules, syringe-style dispensers and selected medicine-bottle formats can be reviewed. Material grade, testing and any required regulatory documentation must be confirmed for the application.

COLLECTION & CAPABILITIES

# Material selection across the range

A broad palette of materials, selected around the complete packaging system.

### HDPE bottle collection

Plastic bottles with varied shapes and dispensing heads for lotion and personal-care collections.

### Plastic dispensing collection

A range of plastic bottles shows pump, spray and flip-top dispensing alternatives.

### Clear glass collection

Glass bottles and jars with matched black closures for a coordinated skincare line.

### Glass and bamboo components

Glass and bamboo-component systems illustrate natural textures and refill-oriented assemblies.

### Metal tin formats

An aluminum tin with relief decoration illustrates tactile lettering and screw-lid construction.

### Mineral-composite concept

A mineral-composite concept explores a textured surface and different material expression.

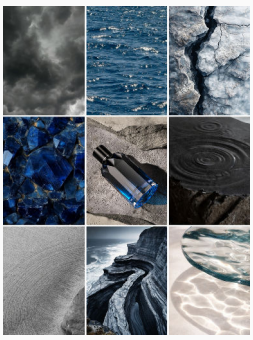

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Glass; PET, PP, HDPE, PETG, acrylic, ABS, AS and PS; selected PLA and PCR options; bamboo, wood, aluminum and paper. Materials are not interchangeable across every design or formula.

COLLECTION & CAPABILITIES

# Concepts, sketches & engineering

Build a proposal from your reference images, sketch or existing product.

### Visual moodboard

A moodboard helps translate color, texture and reference shapes into a design direction.

### Fragrance-concept sketch

A hand-drawn concept explores bottle proportions, cap and decorative motifs.

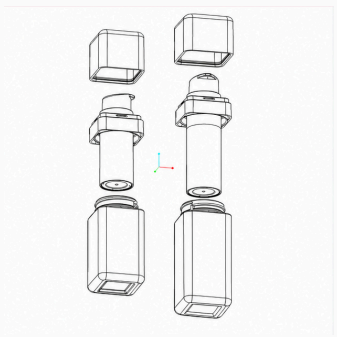

### Skincare structural sketch

Structural sketches show proposed shapes and relationships between components.

### Exploded container view

An exploded view explains how the container and closure components assemble.

### Bottle and pump sketch

Engineering sketches explore the bottle body, pump and protective overcap.

### Sketch-to-3D development

The transition from sketch to finished samples supports design review and approval.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Development can cover brand brief, moodboards, silhouette exploration, 3D renders, structural drawings, component matching, prototype review and an approved production specification.

COLLECTION & CAPABILITIES

# Tooling & production capabilities

From an existing design platform to a custom-shaped container.

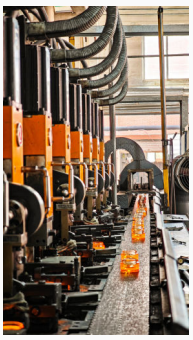

### Prototype / model example

A physical model helps evaluate shape, proportions and tactile design before tooling.

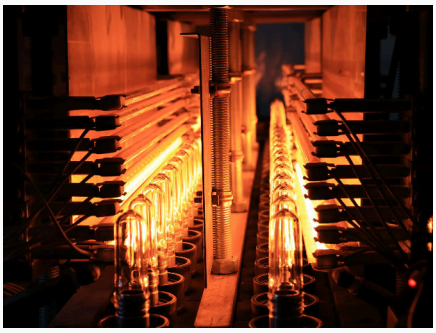

### 3D prototype process

3D printing supports prototype development and design review.

### Production-line capability

Automated equipment illustrates a packaging production-line capability.

### Glass-forming capability

Glass-forming equipment shapes containers before subsequent cooling and finishing.

### Component-molding machinery

Molding equipment produces selected plastic components to an approved specification.

### Protective component handling

Protective handling and packing help prevent surface and closure damage.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Available routes include glass forming, plastic injection molding, stretch and extrusion blow molding, component assembly and decoration. Existing platforms, modified designs and new private tooling are assessed per brief.

**COLLECTION & CAPABILITIES**

# Sampling, quality & supply

A managed route from packaging enquiry to an approved order.

### Container samples for dimensional and visual review

Glass bottles and jars with matched black closures for a coordinated skincare line.

### Closure and pipette component samples

Closure and pipette samples support fit, appearance and functional evaluation.

### Protective handling of closure components

Protective handling and packing help prevent surface and closure damage.

### Packed cartons prepared for shipment

Packed cartons illustrate shipment preparation and storage before dispatch.

### Component production and process control

Molding equipment produces selected plastic components to an approved specification.

### Design drawings and finished-pack samples

The transition from sketch to finished samples supports design review and approval.

## WHAT WE CAN DEVELOP FOR YOUR BRAND

Voutsinas Packaging coordinates selection, quotations, samples and supply with production partners. Dimensional, visual, functional and compatibility checks, sampling and traceability are agreed as applicable.

**YOUR PROJECT**

# From your brief to your pack.

Send a photo, a sketch or the page showing the packaging you like.

### Share your design direction

A hand-drawn concept explores bottle proportions, cap and decorative motifs.

### Select container and material

Glass bottles and jars with matched black closures for a coordinated skincare line.

### Match closure and dispenser

Pumps and actuator shapes are matched to neck size, dose and the complete container.

### Choose finish and decoration

Frosting creates a satin, translucent glass appearance.

### Review a model or prototype

A physical model helps evaluate shape, proportions and tactile design before tooling.

### Plan quantity and delivery

Packed cartons illustrate shipment preparation and storage before dispatch.

## A CLEAR BRIEF HELPS US PROPOSE THE RIGHT OPTIONS

Tell us the product type, fill volume, quantity, material, closure, artwork, destination and launch timing. Final specifications, compatibility, MOQ, pricing and delivery are confirmed in your project quotation.

VOUTSINAS.
